

Run-off services

Reduce liabilities while maintaining control and compliance.

Accelerate run-off. Protect value.

Managing run off portfolios requires balancing liability reduction with control. Discontinued business lines, legacy portfolios and post-merger integrations create long tail exposures, regulatory pressure, and ongoing operational demands. Without structured management, costs can rise, and capital efficiency may be impacted.

Run off is about actively managing liabilities in line with Solvency II requirements while safeguarding policyholders and maintaining service quality.

Van Ameyde delivers end-to-end run off solutions, combining liability assessment with proactive claims management across all non-lifelines. We assess known claims and IBNR exposures to support accurate reserving and effective capital planning.

Your trusted partner for run-off management

Our teams bring together regulatory expertise, operational experience and pan-European coverage to manage run-off portfolios efficiently and consistently. We take control of claims handling, optimize indemnity spend and ensure compliance at every stage of the process.

By actively managing your portfolio, we help accelerate liability reduction, improve predictability, and maintain high service standards for policyholders.

With decades of experience and advanced claims management capabilities, Van Ameyde enables you to manage run-off with clarity, control and confidence.
